## CORE FEATURES

### ✓ Sync Geotab Diagnostics & DVR to Streamline Workflow

Automatically sync Geotab diagnostic faults, engine hours, odometer, and driver vehicle inspection reports.

### ✓ Powerful Enterprise Level Reporting

Managers can be more proactive on managing work order backlog, costs, staff assignment, downtime, parts and inventory.

### ✓ Purchasing RFQ's, Marketplace

### ✓ Multi-Asset Work Orders

### ✓ ERP Integrations

### ✓ Rotating Assets

### ✓ Inventory Parts & Supplies

### ✓ Asset Tagging & Scanning

### ✓ Custom Report Building

### ✓ Centralized Maintenance Calendar

### ✓ Automatic Work Orders Triggered (e.g. Engine Codes, Battery Voltage, Meter Readings)

## MOBILE MAINTENANCE MANAGEMENT

We would use paper forms that were solely managed by the technicians and sometimes would fall through the cracks as a result of their lack of organisation. The biggest improvement has been the ease of use in regards to creating work orders on the go with the mobile app.
