

Contents - Vol. 22, Fasc. 1-2

Professor Alexander Arhanhel'skii and His Topological Galaxies	1
<i>Jordanka Paneva-Konovska</i> Series in Generalized Bessel-Maitland Functions: Some Convergence Theorems in the Complex Plane	11
<i>U. C. De, C. Özgür, K. Arslan, C. Murathan and A. Yildiz</i> On a Type of P -Sasakian Manifolds	25
<i>Angel Popov</i> On Matrix Functions in Case of Confluent Characteristic Roots	37
<i>Mariana Nedelcheva</i> Characterization of Piecewise Convex Curves through Their d -Functions	47
<i>Leda Galué</i> Results Involving Generalized Hypergeometric Functions	83
<i>Smile Markovski, Marija Mihova</i> An Explicit Formula for Computing the Partition Numbers $p(n)$	101
<i>Jela Šušić and Žarko Pavićević</i> The Normality of Meromorphic Functions along an Arbitrary Curve	121
<i>Maria Falcitelli</i> A Class of Almost Contact Metric Manifolds with Pointwise Constant φ -sectional Curvature	133

Vladimir Petrov Kostov

Eigenvectors in the Context of the
Schur-Szegö Composition of Polynomials 155

Peijie Lin and Warren B. Moors

Rich Families, W -spaces and the Product of
Baire Spaces 175
