MASSEE International Congress of Mathematics 141

V. Popa and M. Telci

Fixed Point Theorems for Mappings Satisfying

Implicit Relations on Two Metric Spaces 143

Nurettin Ergun

On Partially Discrete Refinements 153

Luis Bernal-González

Interpolation by Tamed Entire Functions 161

Anna Kępczyńska

Implicit Difference Functional Inequalities and Applications 167

George A. Anastassiou

Optimal Approximation of Discrete Csiszar f -Divergence 185

Ljubomir B. Ćirić

Fixed Point Theorems for Set-Valued Non-Self

Mappings on Convex Metric Spaces 207

Michael Jung and Todor D. Todorov

A Study of the Constant in the Strengthened Cauchy

Inequality for 3D Elasticity Problems 219

Dimitar K. Dimitrov

Starlike Functions for Approximation

by Subordinate Polynomials 239

Fikret Kuyucu

On Subsemigroups of Stone - Čech

Compactification for Certain Semigroups 245
