

Current Issue - Vol. 25 (2011), Fasc. 1-2

<i>G. Murugusundaramoorthy</i> Subclasses of Starlike Functions of Complex Order Involving Generalized Hypergeometric Functions	1
<i>M. K. Aouf, A. Shamandy, A. O. Mostafa and S. M. Madian</i> On Sandwich Theorem of Analytic Functions Involving Integral Operator	15
<i>Parvan E. Parvanov</i> Weighted Approximation by a Class of Bernstein-Type Operators	31
<i>Borislav R. Draganov</i> On the Approximation by Convolution Operators in Homogeneous Banach Spaces of Periodic Functions	39
<i>Vesko Valov</i> External Characterization of I-Favorable Spaces	61
<i>Peter Rusev</i> Zero-Distribution of a Class of Finite Fourier Transforms	79
<i>Eugenia Pérez</i> Long Time Approximations for Solution of Evolution Equations from Quasimodes: Perturbation Problems	95
<i>Neli Maneva, Kraicho Kraichev and Krassimir Manev</i> Mathematical Models-Based Software Modernization.....	131
Papers Announced at MASSEE International Congress on Mathematics, MICOM-2009, Ohrid, Republic of Macedonia	145
<i>Miloš Čanak, Liljana Stefanovska and Ljubomir Protić</i> Schwarz Function for Vekua Complex Differential Equation	147

Radoslava D. Goranova, Vladimir T. Dimitrov

Using Grid for Mathematical Researches161

L. Stefanovska, M. Čanak and Lj. Protić

Laplace Vector Field for Vekua Differential Equation 169

Kostadin Trenčevski

Special Relativity Based on the $SO(3, C)$

Structural Group and 3-Dimensional Time 193

Nikola Tuneski

On a Class of Functions Defined by Takahashi and Nunokawa 203
